SUMMARY

I am a dedicated Computer Engineering student at COMSATS Lahore, currently pursuing my Bachelor's degree. I have nearly two years of hands-on experience as a Frontend Developer intern at OM Solutionz, where I've refined my skills in building dynamic, user-friendly web applications and gained a solid foundation in the MERN stack, which I am currently completing. I also have moderate experience with backend technologies and a keen interest in AI and cybersecurity. Known for my time efficiency and strong ability to set clear priorities, I excel at managing tasks and meeting deadlines in fast-paced environments. Beyond web development, I have explored mobile app development with Flutter and native platforms, as well as processor design in my recent academic projects. With a passion for learning and problem-solving, I am driven to stay updated on the latest technologies and to contribute to impactful projects in software development and engineering.

Skills

- Next.js
- RESTFUL.Api
- Tailwind
- Figma
- MSSql
- Redux
- Flutter
- Firebase

KEY ACHIEVEMENTS

Web Efficiency Boost

Increased web app efficiency by 25% through code optimization.

Flutter App Leadership

Led a team of 3 to successfully develop 4 Flutter apps.

High Project Delivery

Achieved 98% project delivery rate, exceeding target by 8%.

MERN Project Completion

Completed a MERN stack project in 4 weeks, ahead of schedule.
